Those two events have cost the **United States just under \$15 trillion and growing for the war on terror in the Middle East totaling \$6.4 trillion** and so far, lawmakers have enacted six major coronavirus bills totaling **\$5.3 trillion** and the **Federal Reserve has committed/dispensed \$4.0 trillion out of \$6.2 trillion** allowed.

These major events have dramatically changed life as we know it in America, Israel, and the world.

These figures do not include the enormous costs to businesses and individuals. On a positive note, this has accelerated final-day events.

RE: IMPOSE TRAVEL BAN ON CHINA?

If the probability of a pandemic is greater than roughly 1%, a game-theoretic analysis of the coronavirus indicates the clear dominant strategy is an immediate travel ban on China.

We confront two stylized choices: Aggressive Containment versus No Containment. We face two stylized outcomes: A relatively modest “seasonal flu-like” outcome with relatively low rates of transmission and mortality versus a more deadly “pandemic flu” such as witnessed with the Asian, Hong Kong, Spanish, and Swine Flus.

Costs estimates range from zero in the Seasonal Flu/No Containment outcome to \$3.8 *trillion* in the Pandemic/No Containment outcome. These cost estimates account for both the loss of economic activity and human life and are derived from a recent CEA study.

	“Seasonal Flu”	Pandemic
Aggressive Containment	-\$2.9 Billion	-\$34.6 Billion
No Containment	0	-\$3.8 Trillion

Israel goes into national lockdown beginning on Rosh Hashanah, through Yom Kippur and Sukkoth 72 hours after Abraham Accord Signing

- The three-week national lockdown was timed to coincide with the Rosh Hashana and Yom Kippur holy days and the festival of Sukkot, in the hope of causing less economic damage because business slows down in any case around the holidays. It was also aimed at preventing large family meals that could become petri dishes for the virus.

Research "Game-changer": Spike Protein Increases Heart Attacks and Destroys Immune System

World's first vaccine murder case against Bill Gates, Adar Poonawalla filed in India's High Court

- Petitioner has sought prosecution of AstraZeneca's (Covishield) manufacturer Bill Gates, his partner Adar Poonawalla and other Government officials and leaders involved in the murder of a 23 year old man, who lost his life because of vaccination. The deceased took the Covishield vaccine by believing in the false narrative that the vaccine is completely safe and also owing to the compliance requirement set by the Railways that only double vaccinated people would be allowed to travel.
- The Government of India's AEFI (Adverse Event Following Immunisation) Committee has recently admitted that the death of Dr.Snehal Lunawat, was due to side effects of the Covishield vaccine. The said report has exposed the falsity of the claim made by vaccine syndicate that vaccines are totally safe.

George Soros And Bill Gates' Backed Consortium To Buy U.K. Maker Of Covid Tests For \$41 Million

- Billionaires [George Soros](#) and [Bill Gates](#) are part of a consortium set to buy Mologic, a U.K.-based maker of Covid tests, in an effort to increase access to “affordable state-of-the-art medical technology” around the world, according to a statement released Monday.
- Mologic Ltd, best known today for the deep-nostril technology used to deliver rapid Covid-19 tests. (July 19, 2021)

- Previous testing of potential vaccines for SARS **killed the lab animals.**
- Pfizer said their mRNA had 94 percent efficacy in tests, which helped induce people to take the jabs. **The efficacy waned significantly over six months, which led to calls for more booster shots.**
- **Those who have been jabbed have more potential to be super-spreaders/shedders** than the un-jabbed.
- According to Dr. Geert Vanden Bossche, the **breakout among young people had to do with lockdowns and mask wearing**, which stifled their natural immune system. The fact that their immune system was stifled was exploited by Fauci to call for jabs of children down to five years old.

- Dr. McCullough said **that vial of injection sends RNA instructions that go into every cell to tell it to make the spike protein.** This is not like a piece of the virus going in—it is the RNA of the spike protein going in there, telling it to make the spike protein, then hoping the injected person's body will respond by creating an immune response. *That is what they say.*
- **But is not actually a vaccine. There is no protection against COVID.** And now the people who are vaccinated have the spike protein in their bodies.
- ***Studies are finding spike proteins circulating throughout the body.***
- **A true vaccine all stays in the deltoid muscle.** The body develops an immune response, **and that immune response—not the rest of it— circulates.**

- **If you have had COVID, no need to get jabs.** Dr Peter McCullough said the anti-bodies are lifetime. However, those who have had COVID are being asked to take jabs.
- **The mRNAs are not vaccines; they don't end the coronavirus.** They have short-term effects on severity and/or hospitalization. The so-called vaccinated are getting coronavirus.

Robert Malone, MD

- Dr. Robert Malone talks to host Steve Bannon about the latest news regarding the **Omicron variant** of the Covid-19 virus and the **fake panic that is leading Biden and others to promote booster shots**.
- **“The boosters are a perfect way to basically bias our immune systems so we’re even less able to respond to this new variant.** This is [the equivalent of] jabbing everybody with a flu vaccine from three seasons ago, and expecting it to have effects against the current virus.”

Robert Malone, MD – Report out of the UK

In the UK, a similar situation shows among citizens of 60 years or older, **the fully vaccinated accounted for 89.7% of the SARS-CoV-2 cases versus 3.4% among the unvaccinated.**

Robert Malone, MD – Report out of Israel

- **A report out of Israel reports a nosocomial outbreak involving 16 healthcare workers, 23 exposed patients and two family members. The source was a fully vaccinated COVID-19 patient.**
- **The vaccination rate was 96.2% among all 248 exposed individuals (151 healthcare workers and 97 patients). Out of the 248 people, fourteen fully vaccinated patients became severely ill or died, and two unvaccinated patients developed mild disease.**

*Robert Malone, MD –
High vaccinated countries outbreak*

- The US Centers for Disease Control and Prevention (CDC) **identifies four of the top five counties with the highest percentage of fully vaccinated population (99.9–84.3%) as “high” transmission counties (6).**

Robert Malone, MD

- The initial analysis of the Omicron variant is that it is **less virulent and more transmissible**.
- Early data also suggests that the **current vaccines**, developed against the Alpha strain of COVID, **are not that useful in stopping transmission**. Data also suggest that **break-through cases of fully vaccinated individuals are going to be the norm with the Omicron variant**.

Robert Malone, MD –

Vaccinated exclusion as transmission source questioned

- The data above should make decision makers question their **assumptions that the vaccinated can be excluded as a source of transmission.**

“It appears to be grossly negligent to ignore the vaccinated population as a possible and relevant source of transmission when deciding about public health control measures (1).”

- **Emergency Use Authorization (EUA) gives companies liability cover.**
- **The recent FDA formal approval** was not for existing Pfizer, Moderna, Johnson and Johnson and AstraZeneca products.
- **There is no public and/or private medical discussion or debate on the pros and/or cons of the jabs.** There is one voice, and that is Fauci's—and he is terribly compromised and a liar.
- **No public voice is countering Fauci's comments or assertions.** Friday, December 3, 2021: Fauci says booster shots likely give cross protection against “wide range” of COVID variants.

moderna

AstraZeneca 

VAERS

Vaccine Adverse Event Reporting System

www.vaers.hhs.gov

- **Adverse reactions and even deaths due to the jabs have been kept from the public.** This information is time consuming.
- **The VAERS (<https://vaers.hhs.gov>) doesn't include the accurate numbers of deaths and vaccine injuries associated with the jabs.** ing to report and virtually never mentioned in mainstream media reports.
- The **“take the jab or lose your job”** mandates have lasting damage psychologically, financially and socially and create great division in all areas of life at home, in church, at the workplace and in the community.
- Many successes using **hydroxy (first five days is the key) and ivermectin** are not shared publicly.
- **Very little is said by health officials on building up one's immune system as a precaution against COVID.**

COVID Propaganda

- The focus of the mainstream media has been **to denigrate and belittle those who have died and or had health crises from the vaccine and those who have opposed the vaccines**. And they don't mention people's other health compromises such as diabetes, obesity or other health issues.
- **Those who oppose mRNA jabs are called spreaders of misinformation.**
- **Mainstream media calls ivermectin a horse de-wormer, not mentioning it won a Nobel prize for its effectiveness against parasites** and has been used worldwide (over 4 billion applications with very few side effects).

Conflicts of Interest

Reuters Chairman is Pfizer Investor and Board Member.

- The chairman and former Chief Executive Officer (CEO) of the Reuters news agency – James C. Smith – is a [top investor](#) and [board member](#) for pharmaceuticals giant Pfizer. He was elected to the board in 2014, as well as joining Pfizer's Corporate Governance and Science and Technology [Committees](#). **The news raises serious conflict of interest concerns as corporate media outlets such as Reuters continue to promote Pfizer products, defend pharmaceuticals companies from criticism, and move to silence skeptics.**

CNBC Scott Gottlieb, he is a Pfizer board member and former commissioner of the FDA. He serves a weekly pro-vax pundit on TV. - [Pfizer website](#)

Jabbed vs unjabbed observations

- **Most people who oppose jabs are very informed.**
- In some cases, those 65 years of age and older who were concerned with their immune system being compromised or other health related issues or hospitalization did take the jab. That is their decision.
- **The jabbed are mostly uninformed.** They believe that the CDC, FDA and Fauci have their wellbeing covered, there is minimal risk.
- **Some who have been jabbed regret it.** They won't be taking boosters.

Blind faith:

FDA and CDC have our best interest in mind

- **Too many people naively believe the FDA and CDC aren't going to do anything to harm them.** These individuals are showing blind faith that could have serious consequences.
- **The mRNA jabs are experimental.**
- **No reason young people under 50 years of age should get the jabs, especially those under 18.** Vaccinating them is criminal.
- **Dr. Lee Vliet says the mRNA jabs are damaging the testicles and ovaries,** which will greatly affect the reproductive system. Israel is of concern, serving as Pfizer's test lab. Will they be fully jeopardizing the next generation?

Division in the home, church and office

- **The elderly are being pressured** to get jabbed to be with loved ones.
- **Bible study groups and churches are being divided** between the jabbed and unjabbed.
- **The atmosphere in offices and schools is tense** between the jabbed and unjabbed.
- **Patients are not being allowed to be with loved ones** in the ICU and/or when on ventilators.

Those who have been jabbed by the numbers

- **A majority of our armed forces have received the jab**, with the talk of boosters already in the works. Some top doctors say the more jabs, the worse to one's systems, with risks of micro-clot, compromised immune systems and much more serious illnesses.
- **A high percent of Democrats are jabbed**; most Democratic policy makers have been jabbed.
- **White House: In the 75 days since Biden announced the vaccination requirement, the Federal Government has achieved 96.5% compliance**—meaning employees who have had at least one dose of a COVID-19 vaccination or have a pending or approved exception request—with **92.0% of employees having received at least one COVID-19 vaccination dose**.

Those who have been jabbed by the numbers

- **Defense One**: As of Monday, 92 percent of **Marines** are fully vaccinated and 95 percent have at least one shot, leaving about 9,000 people without any vaccine immunity.
- Meanwhile, the Navy on Nov. 24, officials **reported** a fully-vaxxed rate of 97 percent and a partially vaccinated rate of 99.8 percent.

*Who hasn't gotten the COVID-19 vaccine yet?
37 percent of the U.S. unjabbed*

- A Pew Research Center survey published in September found that only 57% of White Evangelical Protestants had received at least one shot of the vaccine, compared to 86% of Hispanic Catholics, 79% of White Catholics, 73% of White non-Evangelicals and 70% of Black Evangelicals.
- **Nine months since the first COVID-19 vaccine was approved**, more than 120 million Americans have not yet received one dose.
- **Children younger than 12 are the only age group currently ineligible to receive the vaccine.** There are 48 million people in that age group.

Who hasn't gotten the COVID-19 vaccine yet?

- **The remaining 72 million are older than 12 and therefore eligible to get vaccinated.** Vaccination data from the Centers for Disease Control and Prevention (CDC) show that lack of vaccination trends toward younger Americans and states in the Southeastern US.
- **Younger Americans are the largest share of the unvaccinated population.** About 29% of unvaccinated people who are also eligible for the shots are between 12 and 24 years old.
- Older Americans have been eligible for vaccination longer than other age groups and have higher overall vaccination rates. **As of September 16, 7.3 million out of the 54.9 million people 65 and older, have not gotten a shot.**

*Shameful:
Pfizer CEO says people who spread misinformation
on Covid vaccines are 'criminals' – [CNBC](#)*

- **People who spread misinformation on Covid-19 vaccines are “criminals,”** Pfizer CEO Albert Bourla said Tuesday.
- **“They’re criminals because they have literally cost millions of lives,”** he said.
- **He said life for many people can go “back to normal”** once many of the unvaccinated get vaccinated.

Gottlieb: 'A pretty good degree of confidence' people with three doses are protected from omicron

- Former Food and Drug Administration (FDA) Commissioner Scott Gottlieb on Sunday said vaccine developers have "a **pretty good degree of confidence**" that fully vaccinated individuals who have received a **COVID-19 booster** are protected against the omicron variant.

'Truth is losing' fight to stop misinformation in science, outgoing NIH director says

- Francis Collins, MD, PhD, outgoing director of the National Institutes of Health delivered strong words on misinformation in science in an interview with [The Washington Post](#) Nov 19.
- **"Conspiracies are winning here. Truth is losing. That's a really serious indictment of the way in which our society seems to be traveling ,"** he told The Washington Post.
- **"Truth is supposed to be truth,"** Dr. Collins said, "and the fact that your truth would be so heavily modified by your social circle or where you get your news tells you we're in real trouble."

Anti-vaccine Christian broadcaster Marcus Lamb dies at 64 after contracting Covid

- No mention of his serious diabetes. Focused on the anti-vax programs and others conservatives' loss of life.

The real agenda behind mad dash to get every child on the planet injected against a virus that won't affect them

- Fauci, a longtime Gates associate who sits on the Leadership Council of the billionaire's [Decade of Vaccines Collaboration](#), started one year ago with a focus on getting those 65 and up jabbed with the new and highly experimental gene-based Covid "vaccines." Now he is pushing the shots for 5-year-olds while making suggestions that he would like to see them given to infants and toddlers by spring of 2022.
- The Gavi alliance, flush with [\\$1.16 billion in taxpayer dollars it received under the administration of former President Trump](#), is partnering with the World Economic Forum, the United Nations, the Gates Foundation and other globalist organizations to advocate for creating a registered, verifiable, digital ID for every child on the planet.

The real agenda behind mad dash to get every child on the planet injected against a virus that won't affect them

- **“Innovated digital technologies are required at all stages of the immunization value chain to ensure that every child is reached with all recommended vaccines.”**
- **Gavi brags that it “prevented more than 13 million deaths” around the world by providing vaccinations to children in poor countries.**
- What you won't find in any of its documents is how its biggest private financial backer, Bill Gates, **also killed, sterilized and permanently harmed tens of thousands of kids in India and other countries with his experimental injections.**

Gavi's [5-page paper on INFUSE](#) states the following:

“Imagine a future in which all children have access to life-saving vaccines no matter where they live – a future in which parents and health workers ensure their timely vaccination, a future in which they have their own digitally stored health record that cannot be lost or stolen, a future in which, regardless of gender, economic or social standing, this record allows each child (and parents) to have access to a bank account, go to school, access services and ultimately build a prosperous life.”

This future is possible today. With the latest advances in digital technologies that enable more effective ways to register, identify births and to issue proof of identity and authentication for access to services – we are on the brink of building a healthier and more prosperous future for the world’s most vulnerable children.”

Leo Hohmann: Don’t be confused by the bit about “building a healthier and more prosperous future.” That’s just window dressing. This is all about data collection and has nothing to do with health.
